INTRODUCTION TO MAVEN

AIM:

To develop a Java Maven project that reads an mp3 audio file and extracts the artist's name from the metadata of the mp3 file

PROGRAM:

```
1 package sample;
2 import java.nio.file.Path;
3 import java.nio.file.Paths;
4 public class Main {
5     public static void main(String[] args) {
6         if (args.length < 1) {
7             System.out.println("Usage: Mp3Util <path-to-mp3-file>");
8             return;
9         }
10        Path mp3Path = Paths.get(args[0]);
11        String artist = sub.getArtist(mp3Path);
12        if (artist != null) {
13            System.out.println("Artist: " + artist);
14        } else {
15            System.out.println("Could not read artist from: " + mp3Path);
16        }
17    }
18 }
19 |
```

Main.java

```
1 package sample;
2 import com.mpatric.mp3agic.*;
3 import java.io.IOException;
4 import java.nio.file.Path;
5 public class sub {
6     public static String getArtist(Path path) {
7         try {
8             Mp3File mp3file = new Mp3File(path);
9             ID3v2 id3v2Tag = mp3file.getId3v2Tag();
10            if (id3v2Tag != null) {
11                String albumArtist = id3v2Tag.getAlbumArtist();
12                return albumArtist != null ? albumArtist : id3v2Tag.getArtist();
13            }
14            return null;
15        } catch (IOException | UnsupportedTagException | InvalidDataException e) {
16            return null;
17        }
18    }
19 }
20 |
```

sub.java

A screenshot of an IDE window titled 'sample/pom.xml'. The code is an XML file for a Maven project. It includes a project declaration with groupId 'AU', artifactId 'sample', and version '0.0.1-SNAPSHOT'. It also defines properties for maven.compiler.source and target as '11', and junit.version as '5.8.2'. The build section contains two plugins: 'maven-surefire-plugin' and 'maven-failsafe-plugin', both with version '2.22.2'. A configuration for 'maven-jar-plugin' is also present, with groupId 'org.apache.maven.plugins', artifactId 'maven-jar-plugin', version '3.3.0', and a manifest configuration where the mainClass is 'sample.Main'.

```
10 <?xml version="1.0" encoding="UTF-8"?>
11 <!-- https://maven.apache.org/xsd/maven-4.0.0.xsd (xsi:schemaLocation) -->
12 <project xmlns="http://maven.apache.org/POM/4.0.0" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xsi:schemaLocation="http://maven.apache.org/POM/4.0.0 http://maven.apache.org/xsd/maven-4.0.0.xsd">
13   <modelVersion>4.0.0</modelVersion>
